

## FileTrail's SmartOffice Concept

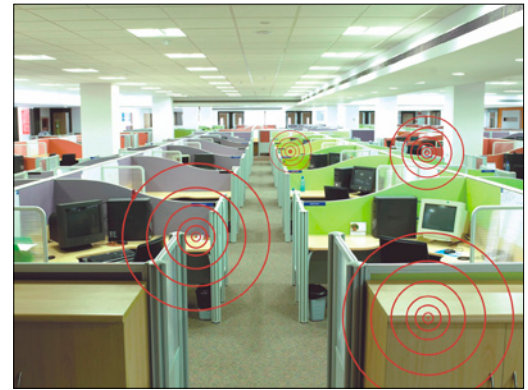

FileTrail's intuitive tracking software and RFID components, listed at the right, complete the SmartOffice and allow you to:

- ▶▶ Complete inventories in one-fifth of the time
- ▶▶ Hunt for missing items like using a metal detector
- ▶▶ Automatically track items as they move between desks, offices, and doorways
- ▶▶ Quickly check-in or check-out in batches
- ▶▶ Alarm exits to prevent unauthorized removal

### Client Stories:

- ▶▶ A municipal court reliably found critical traffic tickets using a SmartMobile in trays of 100 tickets.
- ▶▶ A law firm found a missing patent file in a locked desk using a SmartMobile.
- ▶▶ A district attorney found a missing case file that had been dropped in the back of a coat closet using a SmartMobile.
- ▶▶ A court found a missing case file in a stack of newspapers in a Judges' chamber using a SmartMobile.

- ▶▶ A court caught parties to a case removing a case file from the courthouse using SmartAlarms at the exits.
- ▶▶ A county prevents members of the public from removing original probate court files using a SmartAlarm at the door.
- ▶▶ A law firm recovered a legal file after SmartSensors tracked it out the door late at night, indicating that it had been carried out in the trash.
- ▶▶ A law firm audits 5,500 to 6,000 files in circulation at 300+ desks weekly in four hours using a SmartMobile.
- ▶▶ A law firm reliably tracks patent files going down hallways on a 3-level cart with SmartSensors in the ceiling.
- ▶▶ A law firm tracks files through key steps in the workflow using SmartSensors at drop-off tables and doorways.
- ▶▶ A corporate legal department automatically checks in files as staff drop them at a table for re-filing.
- ▶▶ A county clerks finds files that have been mis-filed on the shelves using a SmartMobile.

### SmartOffice Components

FileTrail's SmartOffice is made up of a variety of components configured to fit each client's unique operation. For more information, see the product sheet on each.

#### Components:

SmartPad™	Reads tags and displays item descriptions on your PC screen.
SmartSensor™	Reads tags and automatically updates the database with the new location.
SmartAlarm™	Prevents unauthorized removal with lights, siren and email.
SmartMobile™	Conducts audits and detects misplaced items with portable RFID.
SmartTags™	Durable, unique identification of each item.
4-port RFID Reader	Ethernet-based connector for four SmartSensors.
2-port RFID Reader	Ethernet-based connector for two SmartSensors.
RF-Enterprise™	Scalable middleware management of hardware, communications, and transactions.

#### Solutions:

File Tracking	Track and manage files from creation through labeling, circulation, archiving and destruction.
Records Management	Apply retention policies, automate disposition and document compliance.
Asset Tracking	Tag, track, locate and manage IT assets, equipment, furniture and more.
Weapons Tracking	Tag, track, protect and secure weapons.
Evidence Tracking	Tag, track and secure evidence.
RF-Integrator™	Location-enable any tracking, inventory or financial system with Web Services.
