

Track and Locate Assets with Confidence

FileTrail's Asset Tracking System

Today's data centers are stretched to the limit. And one of the most taxing uses of an IT professional's time is having to conduct an inventory of electronic assets. To be handled correctly, it is a significant investment of company time and money. Done incorrectly, it could have a significant impact to a company's bottom line in the form of unnecessary capital expenses.

FileTrail has developed a more efficient, less costly solution.

Fully-Automated Asset Tracking

FileTrail RFID Solutions for Asset Tracking delivers an easily integrated, highly configurable method for collecting and tracking asset information. Whether tracking fixed or mobile devices, FileTrail's innovative, automated system helps you quickly scan a room or an office to gain an accurate account of physical assets.

With browser-based technology, and an intuitive interface, FileTrail is easy to learn and access. Everyone from IT professionals to CTOs can log in using any browser and access reports or locate a particular asset in question.

A Fully Integrated System

To deliver a complete end-to-end RFID Asset Management Solution, FileTrail has partnered with Lexmark to leverage the power of their RFID laser print technology. With the industry-first laser-based RFID printer that can print, program, and verify RFID media, Lexmark gives you the ability to further streamline your FileTrail

solution and realize a faster ROI.

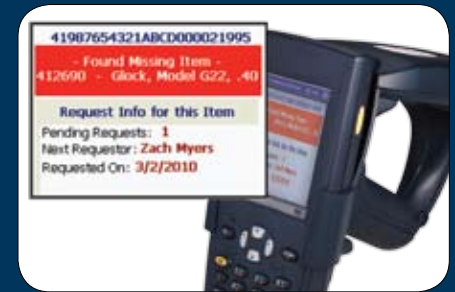

FileTrail's RFID Asset Management Solutions help:

- ▶ **Track Assets:** FileTrail's handheld RF devices help staff quickly inventory a room or office. ID sensors located at exits and doorways can track when assets leave the building, when they return, and which employee is utilizing them.
- ▶ **Save Time:** FileTrail's Asset Management Solution automates the entire inventory process. Plus, it requires no extensive training prior to use.
- ▶ **Utilize Existing Processes:** Requiring no scripts or custom programming, FileTrail can be easily configured to manage all of your assets.
- ▶ **Reduce Costs:** In addition to labor-cost savings, FileTrail's solution ensures you have an accurate account of your assets for tax, capital, audits or upgrade preparation.

RFID SOLUTIONS

RFID Asset Tracking System

Detector Locates Assets Quickly

The Detector on the SmartMobile alerts you to needed or misplaced assets from up to 20 feet away.

Fast Auditing Saves Times

Audits can be done with the SmartMobile in one-fifth of the time. Audit Discrepancy reporting supports reconciliation and accountability.

Portable Location Assignment

The SmartMobile allows assets to be assigned as you move them to new locations using a bar code or RFID tag to identify the location.

Track IT Assets, Furniture and More

FileTrail allows you to define any number of types of items to track. Track IT assets, furniture, documents, and much more.

FileTrail's Asset Tracking System

Features:

- ▶ Easy Search
- ▶ Chain-of-Custody
- ▶ Fast Auditing
- ▶ Portable Detector
- ▶ Configurable Reporting
- ▶ Destruction process
- ▶ Activity Reporting
- ▶ Hosted Solution available

Technical Features:

- ▶ 100% Browser-based since 2002
- ▶ Developed in ASP and Microsoft .Net

Standalone System Requirements:

- ▶ On your PC: Requires IE 7.0, FireFox 3.0, USB port
- ▶ Runs on Windows XP, Vista, and 7 on your PC or Windows Server 2003 / 2008 on your network server

Server-based System Requirements:

- ▶ On your PC: Requires IE 7.0 or FireFox 3.0, USB port
- ▶ On a Server: Runs on Windows Server 2003 / 2008, uses SQL Server 2005 / 2008 or Oracle 9i / 10g

Web-based Hosted Requirements:

- ▶ On your PC: Requires IE 7.0 or FireFox 3.0, USB port
- ▶ Ability to reach www.myfiletrail.com

Benefits:

- ▶ Document compliance
- ▶ Enforce accountability
- ▶ Save time
- ▶ Automate check-in and check-out
- ▶ Record destruction

RFID SOLUTIONS

RFID Asset Tracking System

SmartMobile

At under 2 pounds, the SmartMobile is the lightest long-range portable available. The face - smaller than 6" x 3" - contains a color touchscreen.

SmartAlarm Prevents Unauthorized Removal

Extend your system with a SmartAlarm, using RFID to detect assets that have not been checked out and alerting you with light, siren and email.

Respond to Requests

Pull List and Delivery List reports help you efficiently locate, retrieve and deliver requested assets.

Advance Planning With Calendar

Calendar functionality improves planning for future needs, maintenance, and inspection. Pull List and Delivery List reports ensure you are prepared the day before.
